The building was originally designed for medical offices. so there is sufficient plumbing for almost any anticipated use. However, some of the plumbing rough-ins have been concealed by renovations and not shown on the sketch. The suspended tile ceiling is 8 to 9 feet.

The building exterior is brick veneer on 3 sides and the rear of the building is concrete block. Signage is available on the street and on the doors of the suites.

The suite is clear span, allowing for easy modification of interior walls. The heating and cooling units are roof mounted for easy access and increase the amount of net area available for rent.

There is sufficient parking for most anticipated uses. There is sufficient clearance between the ceiling and roof deck for flexible mechanical configurations. The suite has separate meters for electric and gas.
